

Figure 3

SOILS

Summary Statement:

Dominant soils are thin with exposed or shallow depth to bedrock. Hydric soils, which are indicators of wetlands, occur in pockets. Several locations have moderate to well drained soils and moderate to steep slopes but may be more suitable for human uses.

Legend

- Steep slopes
- Shallow to bedrock
- Rapid runoff
- Moderate to steep slopes
- Well to moderately drained
- Prone to erosion
- Hydric soils
- High water table (6" to surface)
- Poorly drained

- Terre Haute
- Industrial Park
- Reservoir Lands
